

KPORDUGBE DERRICK

kpordugbederrick@gmail.com | +233 594132077 | Accra, Ghana

Software Engineer with over five years of proven experience in designing, developing, and deploying scalable web applications and cloud-based solutions. Highly proficient in modern technologies including React, Next.js, Django, FastApi, Express.js, TypeScript, and AWS. Adept at architecting clean, maintainable systems, developing RESTful APIs, and leading full-stack development from concept to production. Demonstrated expertise in optimizing performance, ensuring security, and implementing CI/CD pipelines for efficient deployments. Passionate about mentoring teams, driving technical excellence, and delivering impactful software solutions that align with business goals.

EXPERIENCE

Software Engineer | K-Pentag Digital – Remote *(Full-time)*

February 2025 – Present | Accra, Ghana

- Built and maintain a fintech platform enabling cross-border payments and crypto/USDT settlement, using Next.js and React for the frontend and Django for backend services and APIs.
- Designed payment architectures supporting cross-border transaction flows, including transaction sequencing, currency conversion logic, and settlement reconciliation between fiat and crypto/USDT rails.
- Implemented integrations with payment institutions (banks and payment processors), handling authentication, transaction status webhooks, and error/retry handling for reliable settlement.
- Architected and managed cloud infrastructure across AWS, DigitalOcean, and Contabo, provisioning servers, configuring networking and security groups, managing environment variables/secrets, and setting up monitoring for uptime and transaction reliability.
- Containerized services with Docker and built CI/CD pipelines for consistent, repeatable deployments across environments.
- Worked through the security and compliance considerations specific to financial transaction systems, including data protection and secure handling of payment credentials.

Software Engineer | MNEMOS – Remote *(Part-time)*

December 2024 – June 2026 | Accra, Ghana

- Engineered and maintained scalable web applications using Next.js, Python, Django, FastApi and Node.js, delivering high-performance and responsive user interfaces while improving system efficiency.
- Designed, containerized, and deployed robust RESTful APIs and microservices using Docker, ensuring smooth CI/CD workflows and consistent environment management across teams.
- Optimized cloud infrastructure across AWS and Google Cloud, leveraging EC2, S3, RDS, and Cloud Run to enhance scalability, security, and reduce operational costs by 30%.
- Collaborated with cross-functional teams to refine architecture, implement monitoring and logging systems, and deliver high-quality features in agile sprints — boosting reliability and productivity.

- As Chief Technology Officer (CTO), oversaw technical strategy, mentored developers, and guided architectural decisions to align engineering outcomes with business objectives.

Full Stack Developer | G&W Technology Consult – Remote

January 2024 – December 2024 | United States

- Architected and implemented scalable backend systems and API endpoints using JavaScript (Express.js) and Python (Django), ensuring seamless data flow, optimized performance, and improved system reliability.
- Engineered a modular and maintainable frontend architecture leveraging TypeScript, React, Next.js, Firebase, Redux, and React Router, enhancing user experience and accelerating feature delivery.
- Designed and optimized database schemas and RESTful APIs to support efficient data management and high-traffic workloads for production applications.
- Implemented automated CI/CD pipelines to streamline build, test, and deployment processes, improving code quality and reducing release cycles by 40%.
- Conducted unit and integration testing using Jest, ensuring code stability, reliability, and adherence to best practices before production releases.
- Collaborated with cross-functional teams to drive feature innovation, improve infrastructure scalability, and align engineering output with business objectives.

Frontend Stack Developer | GIT Plus Limited – Onsite

January 2022 – September 2024 | Accra, Ghana

- Built and deployed multiple high-performance, scalable web applications using JavaScript (React) and Firebase for optimized frontend and backend solutions.
- Integrated third-party services into backend APIs to enhance functionality, streamline processes, and enable seamless data exchange between applications.
- Designed, documented, and tested RESTful APIs with Next.js and Postman, enabling efficient backend services and seamless integration for various web applications.
- Engineered and managed backend infrastructure, including databases, servers, and applications, to support reliable and functional web platforms.
- Developed and maintained databases and APIs using Node.js, Express.js, and MongoDB, ensuring data integrity and streamlined data management.
- Executed full redesigns of existing websites to improve usability, visual appeal, and search engine rankings, enhancing user experience and engagement.
- Led the design and management of social media presence, increasing brand visibility and fostering user engagement across platforms

EDUCATION

Accra Institute of Technology

Bachelor's Degree, Computer Science

July 2019 – April 2024

CERTIFICATION

- AWS Certified Cloud Practitioner – Amazon Web Services (AWS), June 2025

SKILLS

Frontend:

- React.js, Next.js, React Native, Redux, Firebase

Backend:

- Node.js, Express.js, Django, FastApi

Languages:

- JavaScript, TypeScript, Python

Databases:

- MongoDB, PostgreSQL, SQL

Cloud & DevOps:

- AWS (EC2, S3, RDS, Lambda), CI/CD, Git, Google Cloud (Cloud Run, Cloud Storage, Cloud Engine, Cloud SQL), Digital Ocean, Contabo.

Tools & Others:

- Photoshop
