

KPORDUGBE DERRICK

kpordugbederrick@gmail.com | +233 594132077 | Accra, Ghana

Senior Software Engineer with over five years of experience designing, developing, and deploying scalable web applications, APIs, and cloud-based solutions. Proficient in React, Next.js, Django, FastAPI, Express.js, TypeScript, Python, and cloud infrastructures including AWS, GCP, DigitalOcean, Contabo, and Vercel. Experienced in full-stack development, system architecture, third-party integrations, AI integration, workflow automation, CI/CD, and production deployments. Strong problem-solver with experience building reliable, secure, and maintainable solutions across diverse industries. Adaptable and passionate about technology, with the ability to work across software engineering, technical support, systems, and IT operations.

EXPERIENCE

February 2025 – September 2026

Software Engineer | K-Pentag Digital – Remote (Part-time)

Accra, Ghana

- Engineered and maintained scalable fintech applications using Next.js, React, Django, and Python, supporting secure financial workflows and high-performance user experiences.
- Designed and developed RESTful APIs and backend services for cross-border payment processing, currency conversion, transaction management, and fiat-to-crypto/USDT settlement workflows.
- Integrated third-party payment and financial services, implementing transaction sequencing, webhook processing, authentication, validation, retry mechanisms, and reconciliation workflows to improve reliability and transaction accuracy.
- Managed and deployed cloud infrastructure across AWS, DigitalOcean, Contabo, and other environments, using Docker and CI/CD pipelines to support secure, reliable, and scalable production deployments.

December, 2024 – August, 2026
Software Engineer | MNEMOS - Remote
Accra, Ghana

- Designed, containerized, and deployed robust RESTful APIs and microservices using Docker, ensuring smooth CI/CD workflows and consistent environment management across teams.
- Optimized cloud infrastructure across AWS and Google Cloud, leveraging EC2, S3, RDS, and Cloud Run to enhance scalability, security, and reduce operational costs by 30%.
- Integrated AI-powered tools and automation into platform workflows, leveraging AI services and APIs to automate processes, enhance user experiences, and improve operational efficiency.
- Collaborated with cross-functional teams to refine architecture, implement monitoring and logging systems, and deliver high-quality features in agile sprints—boosting reliability and productivity.
- As the Chief Technology Officer (CTO), I oversee technical strategy, mentoring developers, and guiding architectural decisions to align engineering outcomes with business objectives.

January, 2024 – December, 2024
Full Stack Developer | G&W Technology Consult - Remote
United State

- Architected and implemented scalable backend systems and API endpoints using JavaScript (Express.js) and Python (Django), ensuring seamless data flow, optimized performance, and improved system reliability.
- Designed and optimized database schemas and RESTful APIs to support efficient data management and high-traffic workloads for production applications.
- Implemented automated CI/CD pipelines to streamline build, test, and deployment processes, improving code quality and reducing release cycles by 40%.
- Conducted unit and integration testing using Jest, ensuring code stability, reliability, and adherence to best practices before production releases.
- Collaborated with cross-functional teams to drive feature innovation, improve infrastructure scalability, and align engineering output with business objectives.

January, 2022 – September, 2024

Frontend Stack Developer | GIT Plus Limited - Onsite

Accra, Ghana

- Built and deployed multiple high-performance, scalable web applications using JavaScript (React) and Firebase for optimized frontend and backend solutions.
- Integrated third-party services into backend APIs to enhance functionality, streamline processes, and enable seamless data exchange between applications.
- Engineered and managed backend infrastructure, including databases, servers, and applications, to support reliable and functional web platforms.
- Developed and maintained databases and APIs using Node.js, Express.js, and MongoDB, ensuring data integrity and streamlined data management.
- Led the design and management of social media presence, increasing brand visibility and fostering user engagement across platforms.

EDUCATION

Accra Institute of Technology

Bachelor's degree, Computer Science

July 2019 – April 2024

CERTIFICATION

- AWS Certified Cloud Practitioner – Amazon Web Services (AWS), June 2025

SKILLS

Frontend:

- React.js, Next.js, React Native, Redux, Firebase

Backend:

- Node.js, Express.js, Django, FastApi

Languages:

- JavaScript, TypeScript, Python

Databases:

- MongoDB, PostgreSQL, SQL

Cloud & DevOps:

- AWS (EC2, S3, RDS, Lambda), CI/CD, Git

Tools & Others:

- Photoshop
