SUMMARY

Full-stack software engineer with nearly five years of experience building production web platforms with React/Next.js, Django, .NET and Node.js. Currently building cross-border payment and USDT settlement systems at K-Pentag Digital; former CTO at MNEMOS, where I led architecture and cut cloud costs by 30%. AWS Certified Cloud Practitioner.

EXPERIENCE

Software Engineer | K-Pentag Digital

Feb 2025 – Present

Hybrid (Full-time) | Accra, Ghana

- Built and maintained a cross-border payments and USDT settlement platform using Next.js/React, Django, .NET and REST APIs, serving 700+ users and merchants.
- Designed payment flows covering transaction sequencing, currency conversion, payment processing, and fiat-to-crypto/USDT settlement reconciliation, supporting 1,000+ transactions per month.
- Integrated multiple banks, payment processors, and merchant services, implementing authentication, transaction-status webhooks, idempotent processing, error handling, and retry logic to improve payment reliability.
- Managed infrastructure across AWS, DigitalOcean, and Contabo, including servers, networking, security configuration, secrets management, application deployments, and transaction monitoring.
- Containerized services with Docker and built CI/CD pipelines for repeatable and consistent deployments across development, staging, and production environments.
- Applied security practices for financial systems, including webhook signature verification, API authentication and authorization, secure secrets management, input validation, and controlled access to sensitive transaction data.

Software Engineer & CTO | MNEMOS

Dec 2024 – Jun 2026

Remote (Part-time) | Accra, Ghana

- As CTO, set technical strategy, guided architecture decisions, and mentored engineers, aligning engineering priorities and delivery with business goals.
- Built and maintained an AI-powered edtech platform using Next.js, FastAPI, and Node.js, contributing to the product from initial development through production deployment. Live at <https://mnemosmed.com>.
- Integrated AI services and APIs into the platform, developing AI-powered features and backend workflows that supported intelligent learning experiences and automated application processes.
- Designed, containerized with Docker, and deployed REST APIs and microservices with CI/CD pipelines, enabling consistent and repeatable environments across development and production.
- Optimized AWS and Google Cloud infrastructure (EC2, S3, RDS, Cloud Run), improving scalability and security while reducing operational costs by 30%.
- Implemented monitoring and centralized logging and delivered features through agile development cycles, improving system observability, accelerating production issue detection, and supporting reliable application operations.

Full-Stack Developer | G&W Technology Consult

Jan 2024 – Dec 2024

Remote | United States

- Built and deployed production web applications using React, Node.js, Express.js, MongoDB, and Firebase, delivering responsive frontend experiences and supporting backend services.
- Designed, documented, and tested REST APIs using Postman, integrating third-party services to enable reliable data exchange and application workflows.
- Developed and maintained databases, API endpoints, and backend services with Node.js, Express.js, and MongoDB, ensuring data integrity and reliable application performance.
- Managed backend infrastructure, including databases, servers, application deployments, and environment configuration, supporting stable production operations.
- Redesigned and optimized existing websites to improve usability, responsiveness, visual appeal, and page performance, contributing to improved user experience and search-engine visibility.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, React Native, Firebase

Backend: Django/DRF, .NET, FastAPI, Node.js, Express.js, REST APIs, webhooks, microservices

Languages: JavaScript, TypeScript, Python, SQL

Databases: PostgreSQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), Google Cloud (Cloud Run, Cloud Storage, Compute Engine, Cloud SQL), DigitalOcean, Contabo, Docker, CI/CD, Git

Testing & tools: Jest, Postman

EDUCATION

Accra Institute of Technology
Bachelor's Degree, Computer Science

July 2019 – April 2024

CERTIFICATION

AWS Certified Cloud Practitioner – Amazon Web Services (AWS), June 2025
